

IZUMI
AMERICA

Join Izumi America in the future of marketing and display with our Free-Floatt projection film. Providing a perfect viewing surface through high quality and consistent design. Enabling you to showcase your products and maintain your competitive edge in the business world.

Izumi America's Free-Floatt is a clear projection film when used with a standard projector produces a holographic 3D-like floating image effect on any glass or acrylic surface. The film offers shatter proof and UV light transmittance below 1% with great diversity for both front and rear screen projection. The wide viewing angles offer impressively bright images while contributing to a futuristic look that is non-static. The marketing possibilities are endless, allowing you to remain fresh and relevant with very little effort.

REAR PROJECTION
